

Continuous Data Replication and Recovery for Your Windows Servers

Double-Take Backup provides a continuously updated copy of critical data at a remote site, which minimizes data loss should a server recovery be necessary. This is more reliable, less complex and takes less time than traditional recovery from tape media.

- Data protection at a remote site
- Back up your data with ease
- Eliminate the costs of tape media and archiving services

As a Double-Take Business Partner, we will work closely with you to design, deliver, test, implement and support a solution that meets your specific requirements. We're your one-stop shop for innovative business solutions. Datanational is positioned to help you meet today's growing business demands and those of the future. Contact us for product information and pricing.
