## eConnect Supplier Portal

Simplify your supplier relations with a web-based portal,
24/7 hosting & management and automated workflow.

# *Electronically*

Acknowledge Purchase Orders
Report Shipments against PO's
Update Product Lead Times
Update Scheduled Delivery Times

### *eBusiness Made Simple*

With Datanational's eConnect Supplier Portal, you will deliver on-line visibility of open purchase orders to your suppliers. In addition to a web-based Purchase Order Inquiry, your authorized suppliers can also electronically acknowledge purchase orders, update scheduled delivery times, update product lead times and report shipments against their scheduled purchase orders or even the individual PO lines.

### *Automated Workflow*

eConnect Supplier Portal includes extensive event messaging and communication functions with all of the parties involved, including planners, buyers, and supplier's users. Requests for changes in delivery times, quantities, or product lead times are e-mailed to an easily maintainable e-mail distribution list, based on everyones assigned roles. Select accepted changes will automatically update your ERP system, eliminating secondary transaction entry and efficiently closing the workflow loop automatically.

### *One Scan Receipt Process*

As shipments are reported on the Portal, a unique transaction number (ASN) is generated and barcoded on the shipping paperwork. When the shipment is received at your door, the ASN# can be scanned at your receiving dock with a barcode scanner directly into your ERP system. This is done via a streamlined PO receiving program for a simple, one-scan receipt process.

### *Expert 24/7 Support*

The Portal resides on a web server that is hosted and managed around the clock by Datanational's technical support team.

### *The Datanational Advantage*

We are engaged by Automotive Aftermarket companies to provide knowledge and resources for specific IT projects. We deliver industry knowledge and expertise to meet with the aftermarket requirements, deliver, document and train. Then we depart until we're needed for another successful project.
